ONE SYSTEM – TWO FUNCTIONS

Share your Slides Directly from your Microscope

With the world's most unique system:

- 1. Seamless Live Broadcasting:**
Video-stream your microscope's live feed directly to your colleagues – uncompressed in the highest quality at any time.
- 2. Effortless Slide Sharing:**
Quickly scan your slides with your microscope and share them instantly via link/QR code with your colleagues.

VIDEO STREAM YOUR VIEW

Accuracy with Real-Time Slide Broadcasting

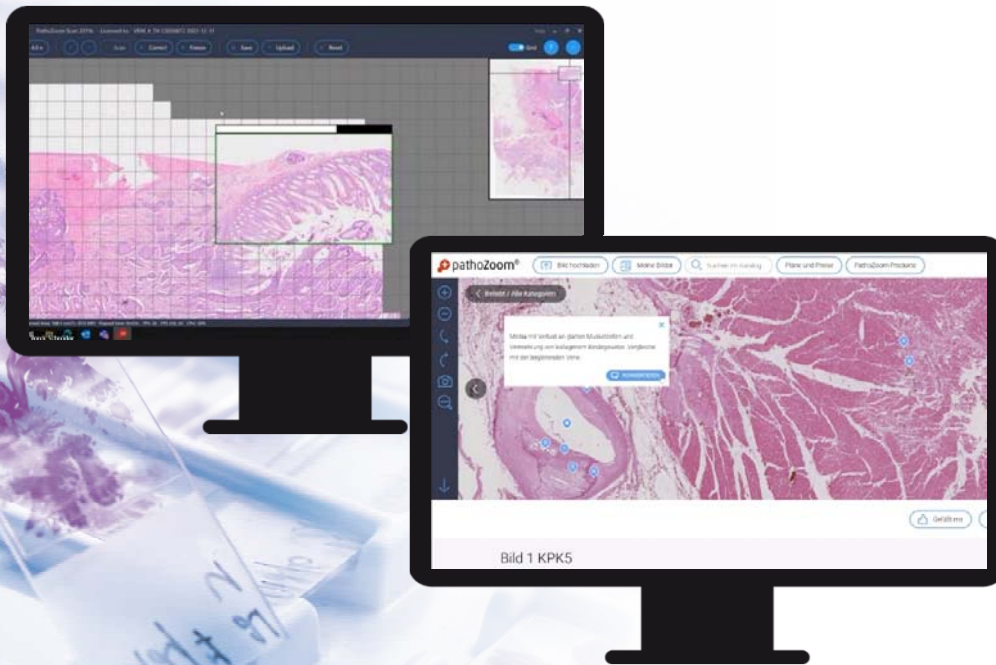

- **Uncompressed Clarity**
Present your slides with a video stream in real-time to peers without any loss of quality – crucial for precision diagnostics
- **... to foster Collaboration**
Benefit from instant exchange and seamless collaboration with colleagues, no matter where they are located.
- **.. to accelerate Decision**
Obtain a second opinion in moments, ensuring rapid and confident diagnostic conclusions.

MANUAL SCANNING

Turn your Microscope into a Scanner

- 1. Precision Scanning:**
Scan the whole slide or a region of interest with your microscope in your desired magnification.
- 2. Secure Slide Storage:**
Save your scanned slide accessible in the exclusive PathoZoom® SlideCloud – securely stored and ready whenever you are.
- 3. Simple Sharing:**
Distribute your slide seamlessly to colleagues just by providing a straightforward link or QR code. Make collaboration easier with the convenience of a direct download feature.

ADVANCED COLLABORATION

Telepathology Reimagined: The Ideal Platform

- Second opinions
- Frozen sections
- Tumor boards
- Education and training

Revolutionary Advanced Viewing Technology

- Engage with your slides like never before using the world's fastest viewer.
- Navigate your slides with ease using frictionless zooming and image rotation
- Annotate with a variety of tools, measure with accuracy, utilizing tools built for efficiency

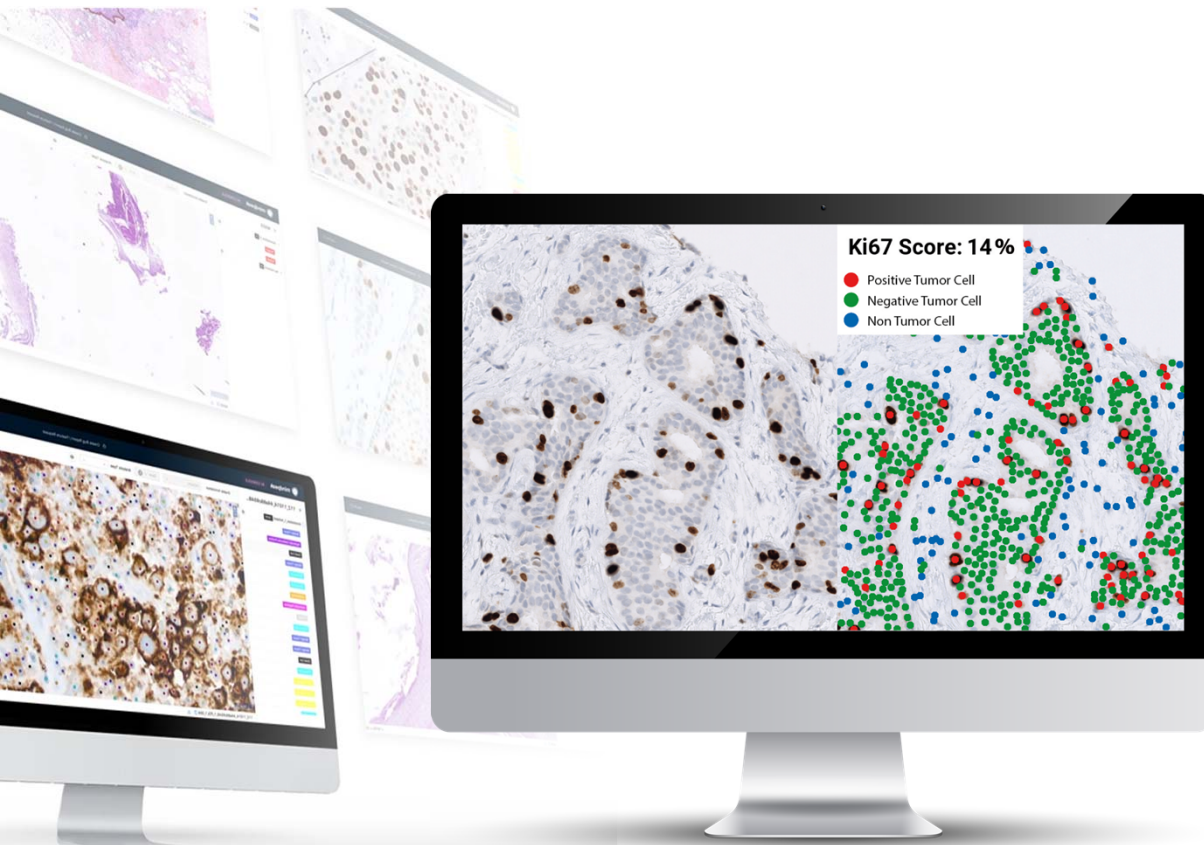

AI AS YOUR ASSISTANT

Empower your Analysis with AI Integration

Harness the power of AI modules with your microscope – optionally integrated into the PathoZoom® LiveView system.

- The AI performs your routine tasks, such as cell counting, precisely – because your AI assistant maintains **total concentration** at all times.
- Your Analysis of biomarkers such as PD-L1, Ki67, HER2, ER/PR become **much more effective**.
